## **Internet Programming - CSE326**

### **Coding Project**

### **FINAL REPORT**

---

**PROJECT TITLE** : Designing an Indian Electricity Website

**GROUP NAME** : Coding Geeks

#### **TEAM MEMBER 1**

Name : Amit Kumar

Registration Number : 12215906

#### **TEAM MEMBER 2**

Name : Anurag Dudy

Registration Number : 12215357

#### **TEAM MEMBER 3**

Name : Kshitez

Registration Number : 12214260

# **What is a Webpage & Website ?**

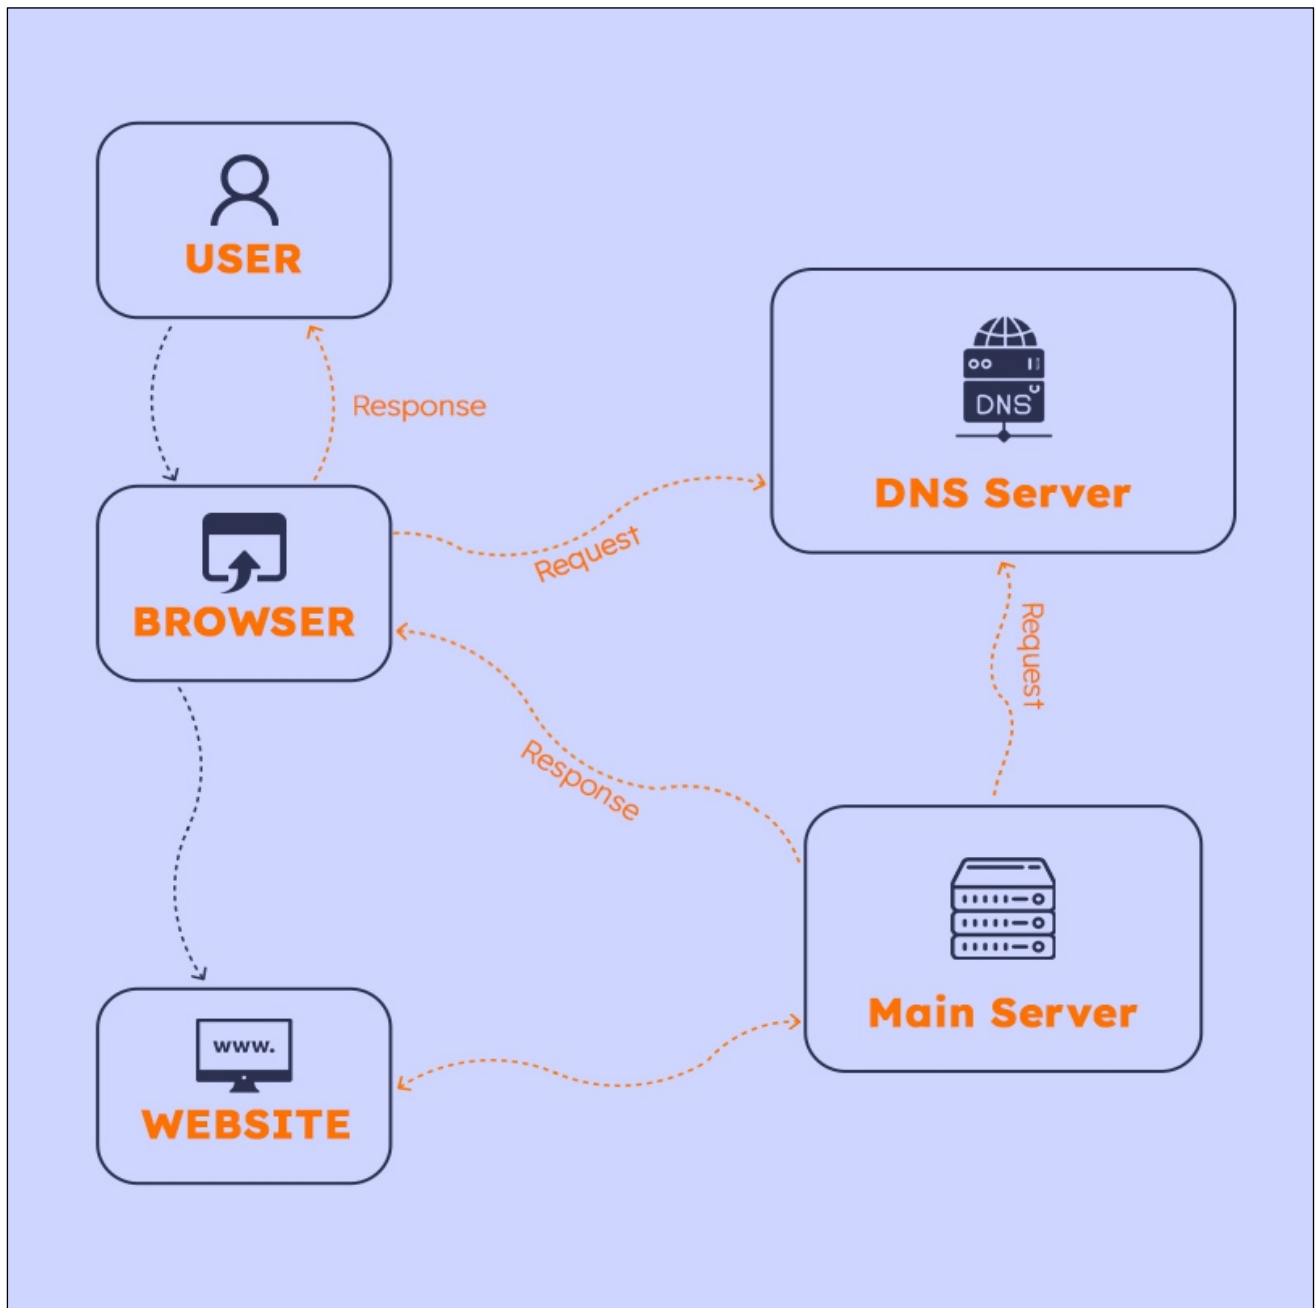

Webpage is a single document or page that is displayed in web browsers like the Firefox, Google Chrome, Opera and so on. This is used to make up the World Wide Web (www) and is used chiefly to sell products and services to users or visitors. A unique URL address is also attached to the webpages and is used to render or access that particular page. Webpages can also be either static or dynamic.

A website is a combination or collection of webpages grouped together, often handled by a person or an organisation, which can be accessed anywhere and anytime by anyone via the internet. This is also a good method to market the businesses and help them grow well. All these pages are linked together using the hyperlinks. Websites can also be either static or interactive. In the meantime, some popular categories of websites are affiliate websites, e-commerce websites, bill payment websites, dating websites, social networking websites and more.

## **How does a Website works ?**

- A user enters a domain name into the search bar of the browser.
- The browser passes the request to the DNS Server which converts the domain name into the IP address of the site.
- Then DNS Server passes the request to the main server where the website is stored.
- And the main server now sends the response to the web browser or to the user.
- The user is now able to view the site.

# ABSTRACT :

## **REQUIREMENTS :**

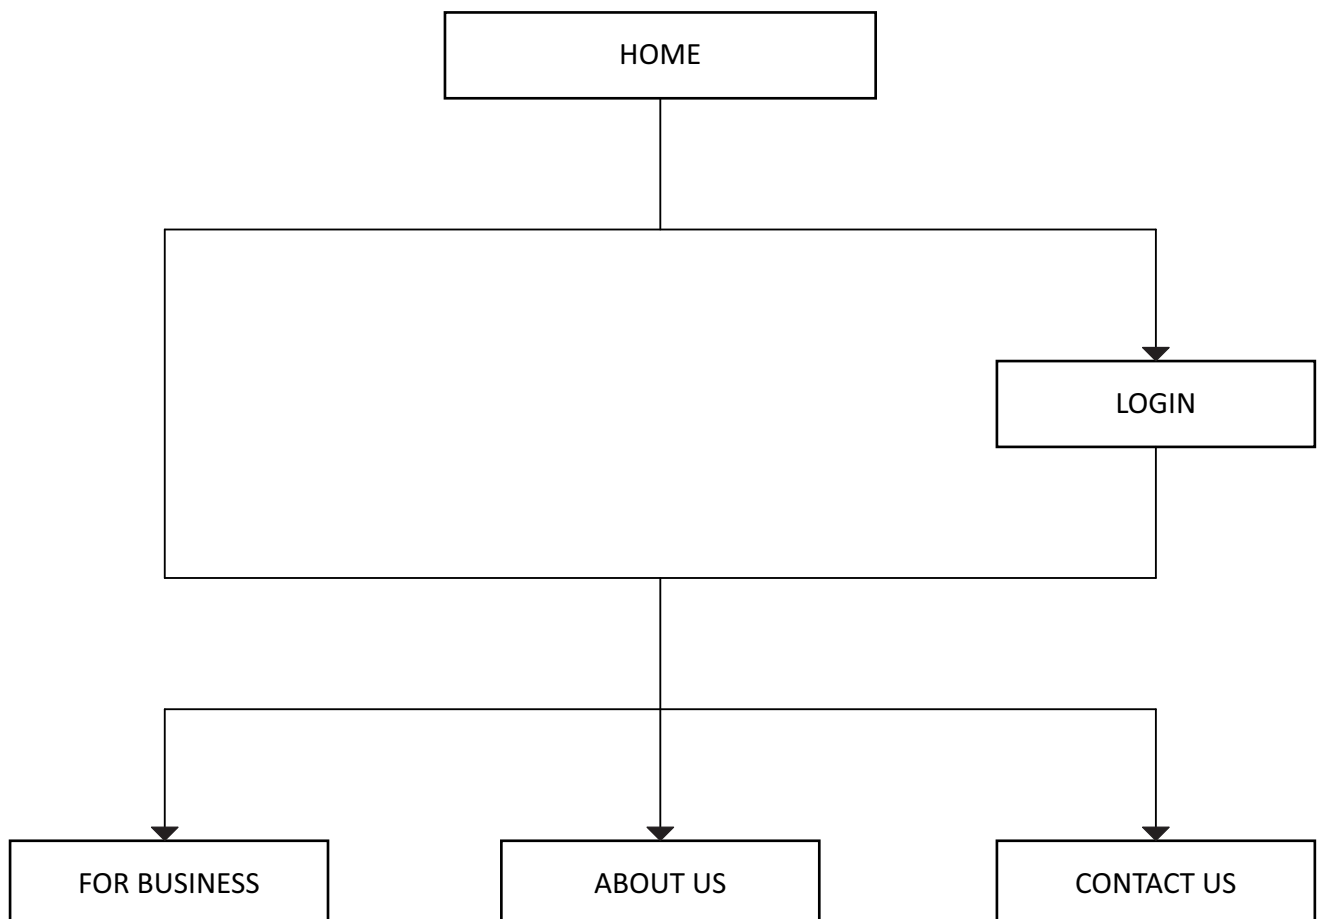

Following are the basic requirements for accessing and proper working of the website :-

- PC, Laptop, Smartphone or Tablet
- Internet Connection
- A Web Browser, for example, Google Chrome, Firefox and Safari.

Following are basic requirements for viewing, editing and/or running the code of the website :-

- Code Editor for HTML, CSS & Javascript — For example, Microsoft Visual Studio Code, Atom or Notepad ++.

## **WEBSITE FLOWCHART DIAGRAM :**

# INDIAN ELECTRICITY WEBSITE

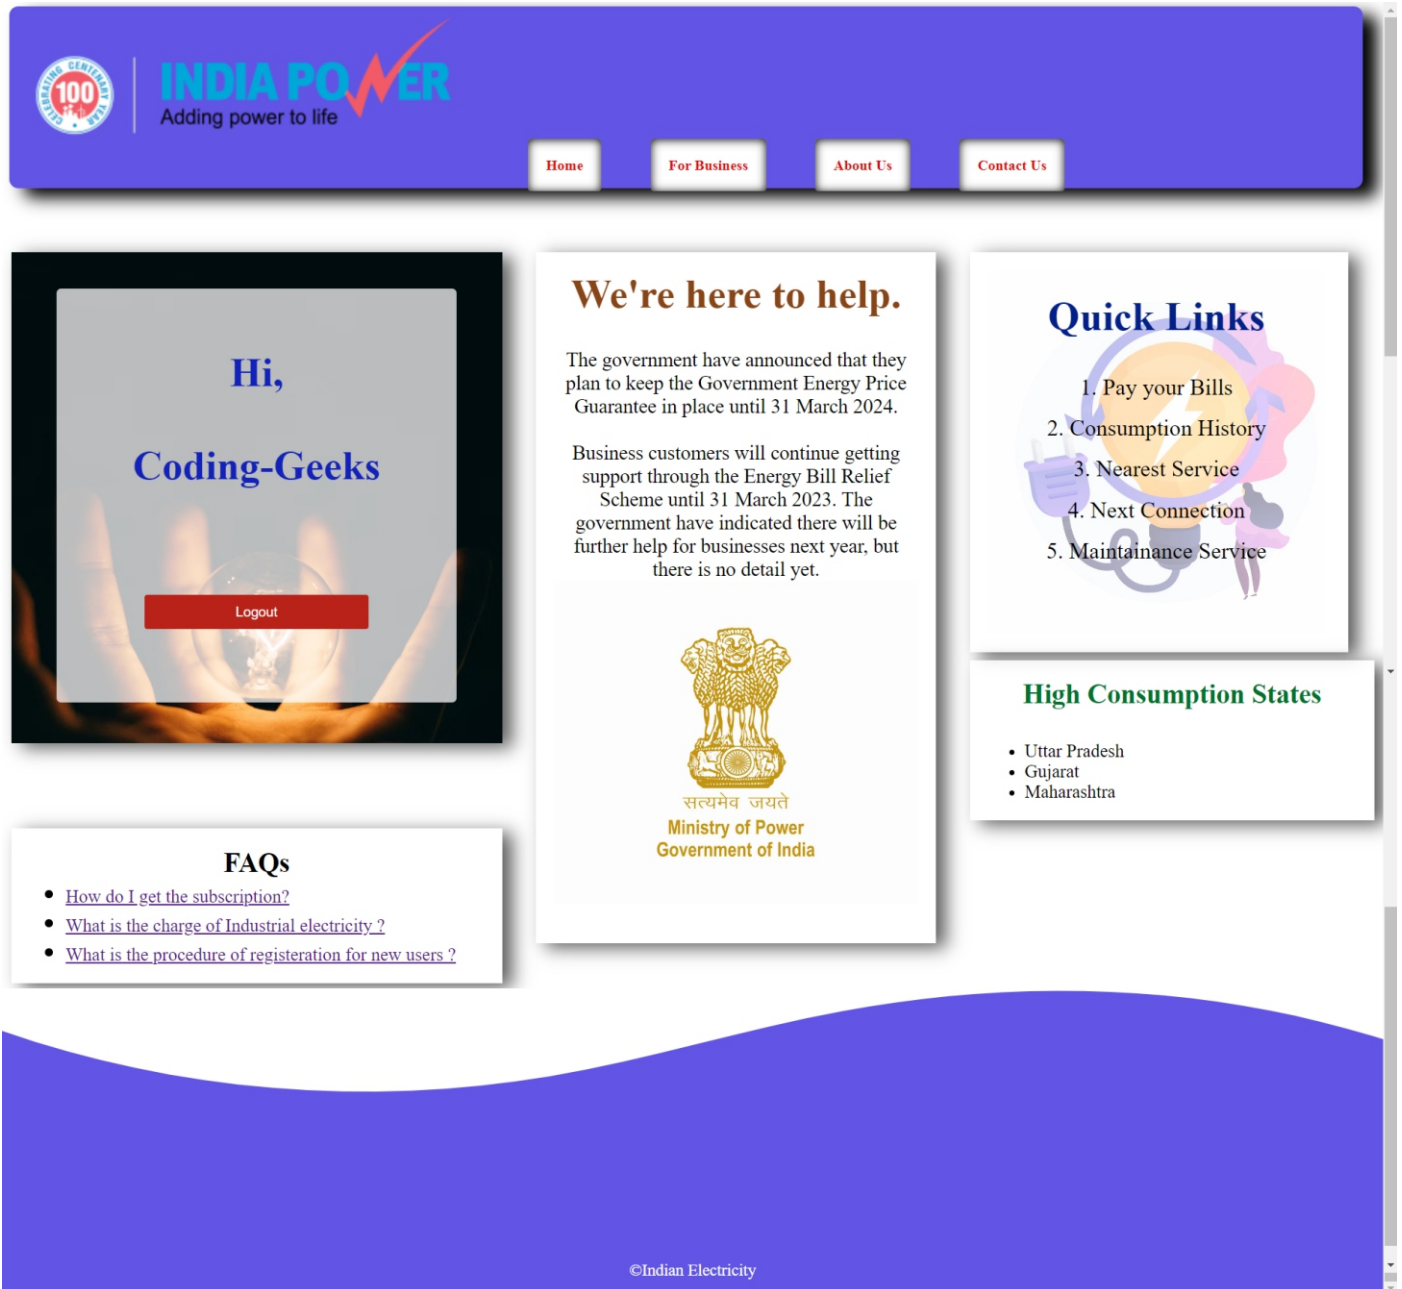

## HOME PAGE :

It is the main page of the website. It consists of the navigation links to other pages of the website, login form, some basic information, Quick Links section, High Consumption States section and FAQ.

### • Before Login :

- **After Login :** After login, it will show name of the user with greeting and logout option instead of login form.

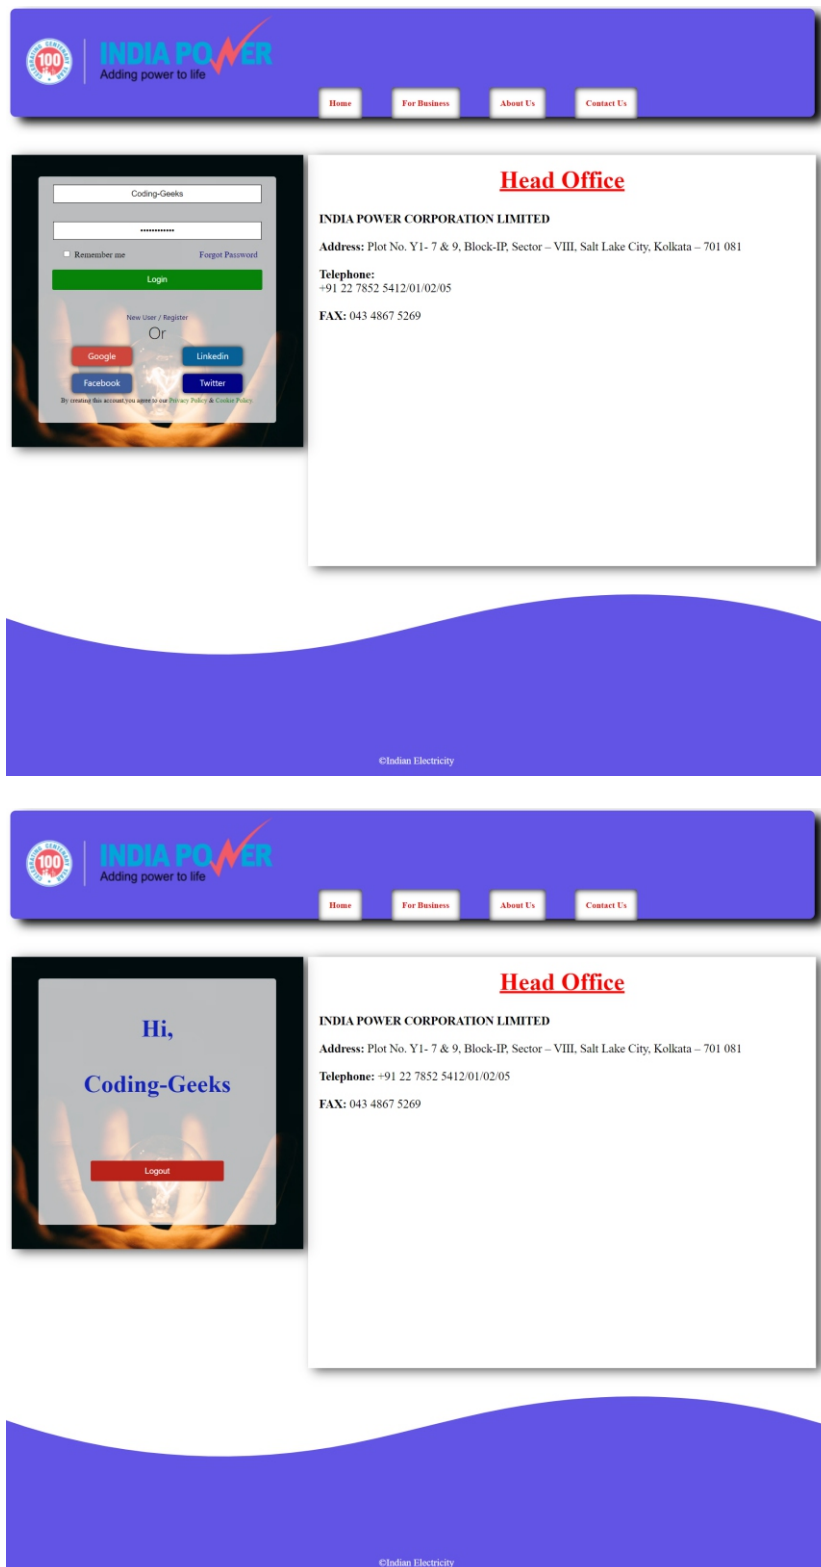

# ABOUT US :

This webpage provides the information about the association. It also contains the navigation bar for other webpages and the login form section or name of the user with greeting and logout option if logged in.

# CONTACT US :

This webpage provides the contact information about Head Office of the association which includes Head Office address, telephone number and fax number. It also contains the navigation bar for other webpages and the login form section or name of the user with greeting and logout option if logged in.

# CODE OF WEBSITE

## HOME PAGE :

India Power Corporation Limited is one of the leading power utilities in India which started its journey in the year 1919. It is an integrated power utility, headquartered in Kolkata, West Bengal with a pan-India presence. At IPCL, we enrich lives through promoting and contributing to the renewable sources of energy where every living being on the planet breathes pollution free air, an environment that is free from carbon emissions. We believe in keeping abreast of the latest digital technologies in the Power sector, which could help boost efficiency and resiliency of power grids and simplify the human interference.

```
<br>
<br>
```

IPCL, an ISO 9001:2015 entity, has actively forayed into a diversified portfolio, with renewable and conventional modes of power generation & distribution and aims to match the increasing demand of power in the future. In the last few years, IPCL has ventured into generation of electricity and has a total generation capacity of around 50 MW comprising of 35.2 MW of wind assets in Gujarat and Karnataka, 2 MW solar asset in West Bengal and 12MW of coal fired thermal power plants in Asansol, West Bengal. It has a Distribution License spread across 798 sq. kms. in Asansol – Ranigunj area of West Bengal.

To improve operational efficiencies and enhance customer satisfaction, the Company has been undertaking several digitisation and grid modernization initiatives over the last few years. The Company has successfully completed initiatives such as SCADA, IoT & Smart Metering based Distribution Transformers and Power Transformers monitoring, AMR / Prepaid enabled meters, 24×7 call centre and data analytics, 24×7 online, online prepaid recharge facilities for almost all the customers.
